Subject: RE: Status of FSP/Planning Documents

Ok. No problem. We'll probably insert this at the bottom the Primary Comment set just so we don't have to renumber all of the tracking tables again.

I realize why you put the additional comment where you did to keep the comments in order by Section number, but I don't think this is critical to maintain if it reduces LOE in revising TCT tracking tables – Do you agree Sean?

Thanks Scott,

I have one more comment on the fish FSP, embedded here. To me, it's pretty important.

Thanks,

Karl

The answer to that question depends on who Karl is referring to the comments being sent: Him, or the Pre-RD Group.

Here is what I know that's been sent to the Pre-RD Group: Bathy FSP, HASP and DQMP

To EPA and sent to Karl via Sean, or Davis:

- Surface Water /Sed Trap FSP,
- Porewater FSP,
- Fish Tissue FSP (Karl had markups Friday that we're incorporating in an update),
- Fish Tracking FSP, QAPP

FSPs we're still working on:

- Fish Tissue (finishing up addressing Karl's comments/additions and correcting TCT comment tracking tables). Sending back update today. Note: Any added, or deleted comments require updating each of the referenced TCT comment tracking tables. Not noting this because we're against any changes to comments, but just pointing out that, due to the TCT comment tracking format, there is a bit more work involved updating everything as a result.
- Surface Sediment FSP (John Kern looking at upriver site locations per Karl's recommendation)
- Subsurface Sediment FSP

Subject: Re: bathy

Fish tissue or tracking? Can't remember..there are so many, and some have been revised- including fish tissue..

Scott can you get a rundown of the status for each FSP so Karl is aware?

Thanks

S

Scott, Do you have the 2009 Bathy Report/Output done by LWG's contractor, or can I please get a figure of the bathy contours from the T4 area?

I'm looking for something like this, but from the most recent survey.

Thanks,

Karl
